

Disclosure NOTICE for AICCRA Stakeholder Engagement Plans (SEPs) and Grievance Mechanism

Accelerating Impacts of CGIAR Climate Research for Africa (AICCRA) is a project being implemented in Africa to help deliver a climate-smart African future driven by science and innovation in agriculture. It is led by the Alliance of Bioversity International and Centre for International Tropical Agriculture (CIAT) and supported by a grant from the International Development Association (IDA) of the World Bank.

The **Project Development Objective** is to strengthen the technical, institutional, and human capacity needed to enhance transfer of climate-relevant information, decision-making tools, and technologies in support of scaling efforts in IDA-eligible countries in Africa. The project is structured into 4 major components and comprises of **Component 1:** Knowledge generation and sharing; **Component 2:** Strengthen Partnership for delivery; and **Component 3:** Validating Climate-Smart Agriculture Innovations through Piloting.

The implementation of AICCRA project involves multiple stakeholders with diverse interest, influence, and receipt of project effects. In light of this, the AICCRA project has prepared 8 Stakeholder Engagement Plans (SEPs) for its 6 focal countries and 2 regional clusters to facilitate meaningful information disclosure and stakeholder engagements. The Project has also prepared a Grievance Mechanism (GM) to guide the receipt, management, and resolution of complaints and questions from project affected persons and stakeholders.

The SEPs and the GM prepared are in accordance with the Environmental and Social Standard 10 (ESS-10) on Stakeholder Engagement and Information Disclosure of the World Bank's Environmental and Social Framework (ESF).
